PROFILE

Hello! I am a Junior Software Engineer pursuing new opportunities. I pour into my work with excitement and know the importance of learning new concepts and ideas. After all, there is always something new to learn! I am eager to continue my growth as a developer, and hope to join an innovative and collaborative team.

PROJECTS

NOTABLE – [Github](#), [Deployed](#)

Notable is built for the avid note taker. Its clean design is optimized for taking and keeping notes / journal entries.

- Frontend implemented and designed with React.js and HTML/CSS
- Built with full CRUD capability, plus full authentication
- Notable was built and deployed using Firebase - as well as utilizes Firebase database and auth
- Project was built in three weeks

RECIPIY (REC-I-PE) – [Github](#)

Recipy (rec-i-pe) is a digital recipe box, used for storing, creating, and updating your favorite recipes. You can also view and save recipes created by others.

- Developed JavaScript/React frontend and Rails/ActiveRecord/Postgres backend application
- Implemented clean UI and UX design for a cohesive user experience while navigating the application
- Built full CRUD capability for user activity
- Project was built in three weeks
